01 PROFILE

I am very passionate about creating, inventing and discovering, in conjunction with mathematical inclination, things that drove to this market segment, where creativity, research and innovation are needed.

Regarding the technical part, I am trained and skilled in following Jedi arts:

- Python (including Django & Flask),
- JavaScript (NodeJS and React JS),
- Bash, Linux Kernel (any distribution, including Kali, Arch and CentOS 7),
- Virtualization (OpenStack, Proxmox, Docker, Kubernetes),
- Databases (MongoDB, PostgreSQL -including timescale DB-, MySQL, Redis, Modex Blockchain Database, ElasticSearch),
- Queue systems (RabbitMQ, Kafka),
- Blockchain Development (Modex BCDB, Sawtooth Hyperledger, Solidity-beginner, but able to write complex smart contract, only that in more time-, HardHat JS, Web3,)
- Cryptography (contributor at key secret sharing service, with elliptic curves -SECP256R1-, and integrated it with proprietary developed wallet generator for ETH and BTC chains.
